

NorthStar Red Batteries

Red Star Technology® uses advanced Pure Lead AGM electrochemistry to deliver long float life even at elevated temperatures.

- 15 year float life at 20°C (68°F)
- 4 year float life at 40°C (104°F)
- EUROBAT design life definition: Long Life (12+ years)
- High energy density
- Operating temperature range: -40°C to +65°C (-40°F to 149°F)
- State-of-the-art automated manufacturing ensures consistency and reliability
- Advanced 3 stage terminal design to ensure leak-free operation - brass terminals provide maximum performance
- 2 year shelf life at 25°C (77°F)
- High modulus Polyphenylene Oxide (PPO) plastic materials designed to withstand extended elevated operating temperatures and maintain high battery compression essential for reliable operation
 - Non-halogenated, thermally sealed plastic casing
 - Flame retardant (UL 94 VO) and LOI of at least 28%
- Integral handles and front access terminals ensure ease of installation and maintenance
- Approved as non-hazardous cargo for ground, sea, and air transport - DOT 49CFR173.159(d), (i) and (ii)

ADVANTAGES

Pure Lead Thin Plate AGM Technology

Conventional flooded and AGM lead acid batteries use lead alloys with additives which increase the strength so they can withstand the handling during the battery making process. The downside of using these alloys and additives is that the batteries suffer from faster corrosion and component aging. Conventional batteries must also allow space inside the battery for positive grid growth.

The manufacturing process used by NorthStar eliminates the need for lead alloys, additives, and wasted space. The plates are inserted into the battery under high compression, which improves performance characteristics, virtually eliminating life limiting failures in high vibration applications.

NorthStar batteries have a longer lifetime and virtually no internal grid growth. Unlike conventional batteries, Pure Lead AGM batteries never experience catastrophic failures.

NorthStar Advanced Manufacturing

NorthStar products are designed to be ultra-high performance and premium quality, with a much longer lifetime than standard products. But to build batteries to such a high standard requires the latest robotic processing and manufacturing technology.

That's why we built the industry's most technologically advanced battery manufacturing facilities in Missouri, USA. We don't cut corners by outsourcing to other countries - all NorthStar batteries are proudly made in the USA.

Our facilities are also built and run to meet the toughest possible environmental requirements, to prevent lead poisoning of the surrounding air, ground, and water.

Our mission is to deliver reliable and sustainable power to the world. Don't settle for an inferior product - when you need the best, you need a NorthStar Battery.
